High-Powered PEMF for Horses:

- **Works like a battery charger for cells:** PEMF gives cells the energy needed to perform, heal and repair.
- **Drawn to cells that need it; fully-charged cells let PEMF energy pass by.** PEMF stimulates all levels of the body: cells, tissues, organs and complete body systems.
- **Can be used ALL over the body. Shows results quickly.** PEMF reduces pain, improves range of motion, increases energy, and improves well-being after just 15 minutes. Improvements last from 4 hours to 4 days; repeat use extends benefits longer and helps reduce/reverse chronic issues (e.g. organ dysfunction) over longer periods.

PEMF OVERVIEW

- PEMF is a drug-free way to relieve pain and inflammation, reduce stress, improve performance, and accelerate healing in horses.
- PEMF can be used to treat the whole body or a specific area/injury.
- PEMF is non-invasive, doesn't hurt or require sedation.
- PEMF often improves performance and helps calm horses before *events*.
- PEMF helps treat areas not easily-available using other methods (e.g. the poll, TMJ joint, upper neck, hamstring, psoas muscle).
- Since muscle twitching is a common response of PEMF treatment PEMF helps identify and/or confirm sore or problem areas.
- Most horses like PEMF and often shift their bodies to get THAT RIGHT SPOT.

PEMF BENEFITS

- Reduced pain and inflammation,
- Improved performance and well-being,
- Increased range of motion and muscle elasticity,
- Accelerated injury recovery and improved circulation,
- Improved relaxation and stress reduction.
- Reduced soreness: Back, Stifle, Joints, Neck, Poll, TMJ, Shoulder or Hooves
- Soft Tissue recovery: Bruised or Torn Muscles, Tendons and Ligaments
- Accelerated injury and/or surgical recovery,
- Accelerated bone healing,
- Accelerated wound recovery,
- Anti-aging, systemic improvement, and improved immunity.
- (Perhaps) best of all, PEMF DOES NO HARM!
