### **Therapeutic effects, benefits, outcomes of High-Powered PEMF for Horses:**

For owners, trainers, therapists, veterinarians and other horse lovers dedicated to helping horses *live long and healthy lives* - High-Powered Pulsed Electromagnetic Field Therapy is a proven augment to professional skills, intuition, experience and ALL other methods.

This is because High-Powered PEMF works like a battery charger for cells giving cells the energy needed to perform, heal and repair. PEMF is drawn to cells that are under-charged electrically; when PEMF interacts with these under-charged cells, it causes them to constrict, force toxins out and draw the energy in. PEMF (predictably) shows results quickly: 95% of people report less pain, improved range of motion, more energy and a greater sense of well-being after just 15 minutes of treatment; horses demonstrate the quick effects through improved gait or being more relaxed etcetera. Initial improvements last from 4 hours to 4 days as the healing process begins. Repeat use extends the period of benefits and helps reduce/reverse chronic issues (such as organ dysfunction) over longer periods.

Additionally, PEMF is a drug-free way to relieve pain and inflammation, reduce stress, improve performance, and accelerate healing in horses. PEMF can be used to treat the whole body or a specific area/injury. PEMF is non-invasive, does not hurt or require sedation. PEMF often improves performance and helps calm horses before *events*. PEMF helps treat areas not easily-available using other methods (e.g. the poll, TMJ joint, upper neck, hamstring, psoas muscle). Since muscle twitching is a common response of PEMF treatment PEMF helps identify and/or confirm sore or problem areas. Most horses like PEMF and demonstrate their approval by shifting their bodies to ensure the coil placement gets exactly on THAT RIGHT SPOT.

Here is a summary of the commonly-observed Equine benefits of PEMF:

- Reduced pain and inflammation,
  - Improved performance and well-being,
  - Increased range of motion and muscle elasticity,
  - Accelerated injury recovery and improved circulation,
  - Improved relaxation and stress reduction.
  - Reduced soreness: Back, Stifle, Joints, Neck, Poll, TMJ, Shoulder or Hooves
  - Soft Tissue recovery: Bruised or Torn Muscles, Tendons and Ligaments
  - Accelerated injury and/or surgical recovery,
  - Accelerated bone healing,
  - Accelerated wound recovery,
  - Anti-aging, systemic improvement, and improved immunity.
- (Perhaps) best of all, PEMF DOES NO HARM!**

## **PEMF 120 High-Powered Pulsed Electromagnetic Field (PEMF) Therapy Device**

The PEMF 120 Equine is the World's most prevalent High-Powered (19,200 gauss) Pulsed Electromagnetic Field Therapy device and has earned a reputation for power, reliability, versatility, comfort, safety, and value over a 12+ year history. The units are manufactured in California according to a rigorous ISO 13485 certification.

Housed in a rugged pelican case mounted on 6 inch wheels the Equine unit is specifically-designed for use in horse environments as well as transport across gravel and natural surfaces; the PEMF 120 Equine is the popular choice of many horse practitioners, horse owners, horse trainers, and race tracks. PEMF 120s have fingertip intensity control to enable a treatment experience perfectly matched to the needs and comfort of the recipient.

PEMF 120 RC Max All-Terrain (or Portable) with:

- Equine Loop
- Equine Butterfly Coil
- Equine "Paddle" Coil with hoof insert
- 24" wings
- Rope Coil – human (for use with RTI human protocols)
- 3 year Manufacturer's warranty
- Quick start human training – including pelvic correction technique
- Shipping within continental US.

**Price: \$20,200**

NOTE: this *blending* of Equine and Human coils is common as Equine units (generally) become multi-purpose very quickly because owners, trainers and riders usually discover that "*what's good for their horses is equally good for them*".
