

**REPLENISHING**  
TECHNOLOGIES

Taking horse and small animal  
care to **new heights.**

**RC MAX**  
**PEMF 120 EQUINE:**

**BEST PERFORMANCE**  
**BEST HEALTH**

For owners, trainers, therapists, veterinarians and other horse lovers dedicated to helping horses and small animals live long and healthy lives - High-Powered Pulsed Electromagnetic Field Therapy is a proven augment to professional skills, intuition, experience and ALL other methods.

*[www.replenishingtechnologies.com](http://www.replenishingtechnologies.com) a division of [www.rcandt.com](http://www.rcandt.com)*

High-Powered PEMF works like a battery charger for cells, giving cells the energy needed to perform, heal and repair.

## ABOUT PEMF HOW IT WORKS

PEMF is drawn to cells that are under-charged electrically: when PEMF interacts with these undercharged cells, it causes them to constrict, force toxins out and draw the energy in. PEMF (predictably) shows results quickly: 95% of users report less pain, improved range of motion, more energy and a greater sense of well-being after just 15 minutes of treatment; horses demonstrate the quick effects through improved gait or being more relaxed.

Initial improvements last from 4 hours to 4 days as the healing process begins. Repeat use extends the period of benefits and helps reduce/reverse chronic issues (such as organ dysfunction) over longer periods.

## BENEFITS

PEMF is a drug-free way to relieve pain and inflammation, reduce stress, improve performance, and accelerate healing in horses. PEMF can be used to treat the whole body or a specific area/injury. PEMF is non-invasive and does not hurt or require sedation. Here is a summary of the commonly observed benefits of PEMF:

- Reduced pain and inflammation
- Improved performance and well-being
- Increased range of motion and muscle elasticity
- Improved circulation
- Improved relaxation and stress reduction
- Reduced soreness: back, Stifle, Joints, Neck, Poll, TMJ, Shoulder or Hooves
- Accelerated injury and/or surgical recovery
- Accelerated bone healing and wound/bruise recovery
- Anti-aging, systemic improvement and improved immunity
- Soft tissue recovery: Torn Muscles, Tendons and Ligaments
- Best of all, PEMF does no harm

**James Comerford,**  
*Founder and CEO*

**PEMF improves performance and often helps calm horses before events.**

## WORKING WITH US

---

PEMF helps treat areas not easily-available using other methods (e.g. the poll, TMJ joint, upper neck, hamstring, psoas muscle). Since muscle twitching is a common response of PEMF treatment, it can be used to help identify and/or confirm sore or problem areas. As a result, trainers are able to quickly establish any area of concern and speed along the recovery process.

The RC MAX PEMF 120 Equine is the very same High-Powered Pulsed Electromagnetic Field Therapy Technology used by more than a dozen of the top NHL and NFL Players as well as a Power Five College.

Most horses like PEMF and demonstrate their approval by shifting their bodies to ensure the coil placement gets exactly on the right spot.

Isn't it time your beloved animals (and you) had the very best too?

## RC&T PEMF DEVICE OFFERINGS FOR HORSE & SMALL ANIMAL CARE

The PEMF 120 is the World's most prevalent High-Powered Pulsed Electromagnetic Field Therapy Device and has earned a reputation for power, reliability, versatility, comfort, safety, and value over a 12+ year history. The Equine / All-Terrain is designed for use with horses. ALL PEMF 120s are (19,200 gauss).

### Best Seller: RC MAX PEMF 120 Equine / All-Terrain 5 Coil Package, Complete training - US \$20,000

- Equine Loop
- Equine "Paddle" Coil with hoof insert
- 3 year manufacturer's warranty
- Quick start human training including pelvic correction technique
- Equine Butterfly Coil
- 24 inch wings
- Shipping within continental US
- Rope Coil - human (for use with RTI human protocols)

*The blending of Equine and Human Coils is common, as Equine units (generally) become multi-purpose very quickly; owners, trainers and riders discover that "what's good for their horses is equally good for them."*

## The DIGITAL Difference

RTI also offers Digital PEMF choices which offer great value for Equine and Small Animal Care-Givers.

Digital devices feature "1 to 10" position intensity control - enabling a precise (identical) treatment experience. RC Digital Max devices are high-powered and use single-plug coils. The RC MAX DIGITAL Portable unit is the typical choice for Equine and Small Animal Care.

### RC MAX DIGITAL PEMF EQUINE DEVICE 4 Coil Package, Hoof Insert, Complete training - US \$20,000

Digital units generally create less power than spark chamber devices (like the RC MAX PEMF 120) but hold the pulse interval 4 times longer thereby gently delivering more energy in shorter time. Solid state engineering creates exceptional reliability and versatility. These features make RTI's DIGITAL PEMF Product offerings the perfect choice for Horse and Small Animal Care.

**RC MAX TWIN PRO DIGITAL PEMF DEVICE**  
**3 Coil Package, Hoof Insert, Complete Training - US \$13,900**

RC MAX TWIN PRO DIGITAL Devices are medium to high-powered. Their greatest advantage is the capability of running 2 coils simultaneously. RC MAX TWIN PRO units utilize single plug “E Connector” coils which twist lock into place. Equine coils feature longer length tails.

There are 2 RC MAX TWIN PRO DIGITAL cabinet selections: the Carrycase (usual choice) and Tabletop.

**DIGITAL DUAL PEMF DEVICES**  
**3 Coil Package, Hoof Insert, Complete Training - US \$7,950**

“Ringer” is 5000+ Gauss for a medium-intensity pulse with treatment times of 5 or 10 minutes. DIGITAL DUALS are operated by a membrane switch equipped with LED lights that illuminate during the treatment cycle. ALL Digital “Ringers” feature a “pulse event” that is up to 4 times longer than that of a spark chamber unit thereby delivering a disproportionately higher amount of healing energy than might be expected. The Hummer (which is not felt) runs simultaneously. RC DIGITAL DUAL units utilize single plug “E Connector” coils which twist lock into place (like those used on the RC MAX DUAL TWIN PRO units). Equine Coils have longer length tails.

These are 2 cabinet selections: Tabletop and Carrycase (most common choice for Equine and Small Animal Care).
