

Back in the game (he loves) - Client Success

We are beyond thrilled to share a recent client success story that showcases the powerful therapeutic benefits of working with our RC MAX PEMF 120 High-Powered Pulsed Electromagnetic Field Therapy Device..

A Cincinnati MD we work with called to tell us about a recent success story using his RC MAX PEMF 120 - in the accelerated and full recovery of an 18 year old Football Player who needed surgery on a broken clavicle. In fact, the Doctor was so excited he couldn't wait to share the news, as follows:

The MD treated the Player 3 to 4 times per week for 20 minutes (starting 3 days after surgery). The Player was cleared to play again after 5 and 1/2 weeks (instead of the normal 10 weeks). This was because the Surgeon was amazed that the X-ray after the 5 and 1/2 weeks looked like the expected X-ray at 10 weeks. What made the Doctor happiest is that the Player confidently used the (injured) shoulder on the opening tackle of the game and jumped up shouting: *LET'S PLAY FOOTBALL!*

To learn more about High-Powered PEMF and the specific PEMF device the Doctor used for this patient success please see: https://replenishingtechnologies.com/public/download/RC_MAX_PEMF_120_Portable_or_Tabletop_for_Human_Wellness_and_Best_Life.pdf

Back in the race (he loves) - Client Success

“I rented a high-powered PEMF unit in December 2022 to expedite the healing process for a Grade-3 ankle sprain after doctors informed me that it would take 7-8 weeks to recover. However, with the PEMF unit and other therapy I was able to recover in just 3-weeks and be ready for the start of the season at Daytona. I’ve since purchased my own PEMF unit to incorporate into my daily training regime. I’m hoping this technology will help others in our sport to train and recover from injuries more effectively.”

Eric Lux has been racing in IMSA and other professional sportscar series since 2005. Eric is a former IMSA Rookie of The Year winner, IMSA Champion, and a Rolex 24 Hours at Daytona winner. Eric is currently racing for Rick Ware Racing in the LMP2 category.

RC&T’s clients include Top Athletes from the NHL, NFL, NCAA, Olympics, Professional Motorsports, and the Professional Sports Practitioners who keep them at their best and on their respective fields. “I have spent a career helping Pro Athletes and People of all health levels recover from injury, surgery or simple (but often painful) wear and tear. One of the very best tools I have found to increase the benefits of my efforts and improve outcomes is High-Powered Pulsed Electromagnetic Field (PEMF) Therapy.”

– Chuck Garlow, LMT, Buffalo, NY

Record-breaking Client Success

In September 2019 we added an RC MAX PEMF 120 High-Powered Pulsed Electromagnetic Field Therapy device from Replenishing Technologies to our training and recovery tools. We knew this machine was the same one being used by a number of top NFL and NHL Players.

I believe incorporating High-Powered PEMF into what we do over the past 3 years at Texas A&M is a major reason why our Aggie Track Athletes have recorded personal bests, set NCAA records, & won Olympic as well as World Championship Gold. What I like most though - is knowing the foundation for these record performances is healthier Athletes in the form of restored tissue, reduced adrenal stress, better sleep, improved focus and faster recovery (to name only a sampling).

I feel we also made a great choice in working with Replenishing Technologies who provided a PEMF Equipment Package with extra coils and other tools at no extra cost plus unmatched Protocol training and Customer Service. For more information about the RC MAX PEMF 120 and how PEMF helps athletes heal, repair and perform see: https://replenishingtechnologies.com/public/download/RC_MAX_PEMF_120_for_Best_Athletic_Performance_and_BestHealth_October_2022.pdf
