

## **“An x-ray showed my lungs were clear” - Client Success**

In 2003 I had my thyroid removed due to cancer. I was given a radiation pill but had a severe reaction to it. I was burned inside; my cells were dead, I turned grey. My doctors had no idea what happened to me or what to do about it. I had several years of weakness and pain. In 2007 I tried Pulsed Electromagnetic Field (PEMF) Therapy at the suggestion of my chiropractor. I used PEMF therapy and Exercise with Oxygen Therapy once a week. After about 6 months an x-ray showed my lungs were clear. As an ordained minister, I credit God first but know that the PEMF and oxygen therapies were part of the answer to my prayers.

## **“My mammogram is clear” - Client Success**

Confirming my happy phone call this week, my mammogram came out perfectly clear. Tests last year had shown significant risk. I believe this is thanks in no small part, to weekly treatments with you for five months. In addition, I have no more shoulder pain, and that has been bothering me for 6-7 years. The treatments may also have something to do with my energy beginning to come back. Thank you! All the best.
